

PRESS RELEASE

Mindlance expands footprint in India, opens new facility in Mumbai

Mumbai, 19th July, 2010: Mindlance, a New Jersey, US-based IT infrastructure service provider, with its India Headquarters at Bangalore, has announced the setting up of a new facility at Mumbai, as a part of its ongoing expansion in India. The new Mumbai facility would be a delivery & sales center for the Western Zone and would primarily cater to customers in Maharashtra, Gujarat, Madhya Pradesh and Goa.

This will be the company's 5th office in India, the other four being located at Bangalore (2 offices), Gurgaon and Jaipur.

To support its aggressive growth plans in India, Mindlance also plans to open another state-of-the-art facility at Bangalore in the current quarter, which would be a center of excellence for its esteemed Partner EMC². Plans are also underway to open offices in Pune & Chennai by mid-2011.

Announcing the new facility, **Kamal Sharma, Group CIO and Business Unit Head IT Infrastructure, Mindlance** said, "We are extremely pleased to inaugurate our new facility in Mumbai, which is strategically placed to target one of the core focus geographies in the domestic market. This facility would help us cater to our highly demanding and ever increasing customer base in the Western region, especially in the BFSI, IT, ITES and Manufacturing sectors".

"An extended arm of pre-sales, technology consultants, SMEs and sales support team will be operating from this office. We will ensure that this facility will be more than just an office in term of amenities and service for both our employees as well as our customers", **added Kamal Sharma.**

In India, Mindlance is present since 2003, initially managing delivery for its global customers and then later expanding its operations to offer its services to the Indian market primarily in the areas of Managed Services, IT Security and Consulting.

Mindlance's diversified service offering portfolio and capabilities to serve clients on various technologies in IT infrastructure space has always been a leading edge. The company also has strategic partnerships with companies like Microsoft, SmoothWall, EMC², Landesk & Symantec to ensure the right pick and best solution to its clients.
